Frozen Walker continuity study: held_out
One trained policy; unknown failure rates are omitted, never shown as zero
Episode return (technical attempts retained)
Exact missing-observation length (action decisions)
black_frame
prior_only
v2_exact
locked_ancestor
posterior_return_once
Primary normalized reward deficit (lower is better)
Exact missing-observation length (action decisions)
Observed functional-failure fraction
Exact missing-observation length (action decisions)
Observed recovery by 100 actions / eligible attempts
Exact missing-observation length (action decisions)
